To install the sounds copy the sy1-files to one of your synth1 soundbank folders.
Please backup the folder before copying the sounds otherwise you will loose its contents.

Even so we started programming those sounds with the older version of Synth1 we already make use of the extended features of synth1 Version 1.05a.

We recommend to try the modulation wheel and pitchbender on all our sounds.
We would be glad to receive some comments ;-)

Have fun !
